- (1) The term 'prebleached', used in the list in Annex IX to characterize the level of manufacture required when certain non-originating materials are used, applies to certain yarns, woven fabrics and knitted or crocheted fabrics which have only been washed after the spinning or weaving operation.
- (2) However, to be regarded as a working or processing conferring origin, thermoprinting has to be accompanied by printing of the transfer paper.
- (3) The term 'Impregnation, coating, covering or laminating' does not cover those operations designed to bind fabrics together.
- (4) The term 'complete making-up' used in the list in Annex IX means that all the operations following cutting of the fabric or knitting or crocheting of the fabric directly to shape have to be performed.

However, making-up shall not necessarily be considered as incomplete where one or more finishing operations have not been carried out.

The following is a list of examples of finishing operations:

- fitting of buttons and/or other types of fastenings,
- making of button-holes,
- finishing off the ends of trouser legs and sleeves or the bottom hemming of skirts and dresses,
- fitting of trimmings and accessories such as pockets, labels, badges, etc,
- ironing and other preparations of garments for sale 'ready made'.

Remarks concerning finishing operations – Special cases

It is possible that in particular manufacturing operations, the accomplishment of finishing operations, especially in the case of a combination of operations, is of such importance that these operations must be considered as going beyond simple finishing. In these particular cases, the non-accomplishing of finishing operations will deprive the making-up of its complete nature.
